Redial, Last Number for an SLT	## or 80	### or 80	### or 80	

- When “Plan 2” or “Plan 3” is selected in System Programming [009], feature numbers starting with “7” are useable with and without “#” added before “7”. For example, the default feature number for setting the “Do Not Disturb” is “714#”. In Plan 2 and Plan 3 “714#” and “#714#” can both be used.

2.3 Feature Number List

If “Plan 2” or “Plan 3” is selected in System Programming [009]:

To make them easier to remember, it may be helpful to replace the new feature numbers for Plan 2 and Plan 3 with the code numbers 50 through 59, in System Programming [012] “Alternative Feature Numbering Plan”.

For example, if the new feature number “#330” for the “Paging — All extensions” feature is replaced with “50”, and “#43” for the “Paging — Answer” feature is replaced with “51”, use these features as follows.

- [Off-hook] [50] [Paging]
- [Off-hook] [51] [Answering]
